# I. FUTURE TREND ENERGY CENTRE

## Mission Statement

To cause those who comes in contact with us:

- To think beyond the norm and become an effective problem solver.
- To recognize that being healthy is each human's responsibility.
- To live now in order to utilize our life and energy to the fullest.
- To share information and research about healthy living.

## Services

Future Trend Energy Centre offers their clients the opportunity to explore cellular vibration and energy approaches to healthy living by providing them with equipment, space and information. Future Trend Energy Centre currently has two PAPIMI devices that produce a pulsed electromagnetic field that when applied to the human body enhances natural energy, decreasing pain, swelling and increasing range of motion. This booklet contains testimonies and documentation of research conducted with world famous athletes who used the PAPIMI to improve their performance and repair sports injuries.

## Contact Information

For your assessment, the introductory session is free. Subsequent sessions for 30 minutes are \$50.00. Call to discuss your situation or schedule a free session. Office hours are **by appointment only** and arranged from 12 noon until 8 pm weekdays, and 12 noon until 5pm Saturdays.

Office Tel: (780) 463-4566  
Bernie & Arlene: (780) 469-6494  
Val: (780) 989-2550

*All statements regarding health testimonials are descriptions of individual experiences and are independent research observations and are not medical claims made by Future Trend Energy Centre.*

## II. THE PAPIMI DEVICE

### Background

The PAPI MI device is a recent discovery from Greece that safely delivers nanosecond pulses of energy which stimulate the human body's natural ability to repair injuries. The PAPI MI is one of the most advanced pulsed energy technologies and because of its effectiveness it is quickly gaining acceptance throughout Europe. Basically, when a high-powered, wide frequency magnetic field collapses it induces ion production with the residual energy. This Bio Energy is then made available on the molecular and cellular levels for pain relief, swelling reduction and increased range of motion. Many clinical studies are complete and other studies continue worldwide. Exposure PAPI MI Bio Energy strengthens endocellular and biological activity, revives neural tissue and superior neural cells and enhances the immune system.

### Who does PAPI MI help?

-  Sports injuries and athletic performance
-  Arthritis, Tendonitis, Osteoarthritis
-  Fast recovery from Asthma, Pneumonia, Bronchitis
-  Musculoskeletal Pains
-  Fast rehabilitation of osteal fractures
-  Fast healing of atonic, chronic or acute ulcers
-  Quickest method of rehabilitation of bums, scars and relevant pains
-  Strong anti-swelling and anti-inflammation action.
-  Back pain, lumbago, sciatica, cervical syndrome
-  Serious sport traumas, sprains, scratches, incisions, bums.
-  Scleroderma, Hemorrhoids.

## Scientific Research: How does it work?

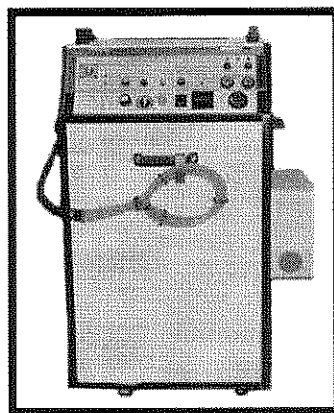

✚ The **PAPIMI** is a device that produces magnetic pulses which generate (or induce) electric pulses inside biological matter with instantaneous peak values in the order of 1,000 volts/cm or less and with an average thermal equivalent value of less than 1 volt/cm. Simply put, the PAPIMI produces a unprecedented natural energy field without heat.

✚ The **PAPIMI** device is a result of the study, comparison and research of the entire past experience in combination with all the relevant technology and scientific Knowledge. The PAP IMI is far ahead of the all relevant devices.

✚ The **PAPIMI** was calculated to produce a peak field, which at the closest distance is well below the ionizing-the-air limit and, besides, the duration of the peak lasts less than a millionth of second - or duration too short to cause ionization breakdown of the air.

✚ Direct microscopic examination of in vitro cells and of animals' cells discloses no difference for the **PAPIMI** exposed cells within the least possible distance, compared to unexposed cells.

✚ The design was meant to assist the already known *in-and-out ion transportation* through the cell membrane, such as the circulation of Na and K ions. However, after the first design in 1988, a new technique in 1990 was becoming state of the art and really popular in biochemical literature which was called electroporation. This technique was applied by conducting similar electrical pulses to the pulses induced by the **PAPIMI** device. This technique is meant to assist or cause the *in-and-out the cell transportation* - **proved to be a universal electrical and biological phenomenon.**

### III. TESTIMONIES OF FAMOUS ATHLETES

**“PLAYING IN ONE MORE KEY GAME CAN BE THE DIFFERENCE BETWEEN MAKING THE PLAYOFFS AND WATCHING THEM ON TV.”**

The PAP-IMI pulses an electromagnetic field into the body, which energizes the cells and assists the body in healing itself. This results in less pain, reduction of swelling, and increased range of motion in the affected areas.

The PAP-IMI is now undergoing clinical studies on pain management. Pain clinics, horse trainers, and sports teams use the device, experiencing excellent results. Additionally, the device has been used in Europe for 12 years in over 200,000 sessions without notable adverse affects.

The first professional test of the PAP-IMI in North America was with the San Francisco 49ers of the National Football League. They saw positive results for a variety of ailments throughout the 2002-2003 seasons, including a reduction in games missed due to acute and chronic injuries. The PAP-IMI is now an everyday treatment in the 49ers training room, and a favorite among their players.

*"I had a real sore heel. After one treatment I said "What did you do? My heel never felt this good!" I noticed a major difference the next morning after treatment"*

**Terrell Owens**  
Wide Receiver

Hermann Maier, three time World Cup and two time Olympic gold medal skier, almost severed his leg in a near-fatal motorcycle accident in August of 2001. After dozens of medical procedures, he was introduced to the PAP-IMI in Europe. In January of 2003, he won the World Cup Super G at Kitzbuehel, Austria in only his second race following his recovery.

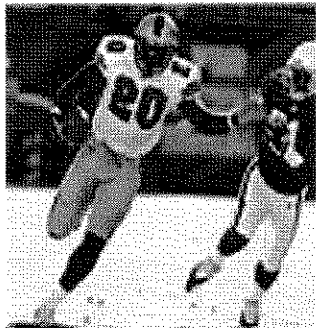

*"No one expected him to walk again - let alone ski competitively," said Austrian team coach*

*All statements regarding health testimonials are descriptions of individual experiences and are independent research observations and are not medical claims made by Future Trend Energy Centre.*

*"The PAP-IMI helped with my recent groin injury. After just two treatments, the pain and swelling were gone, and I was able to move freely. This thing really works!"*

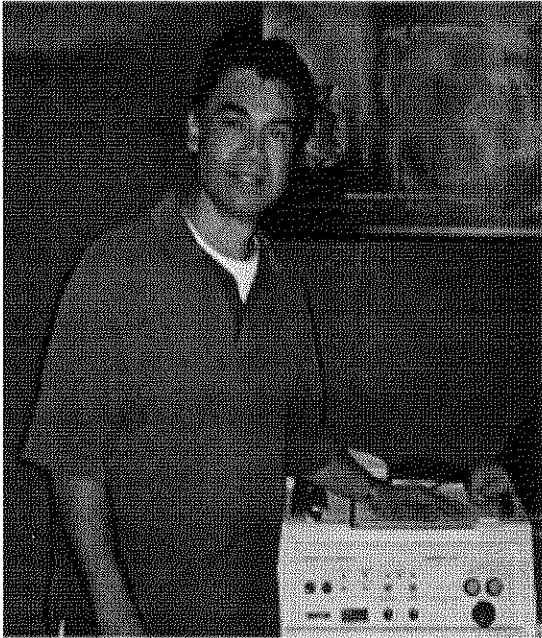

**Paul Byrd**  
MLB Pitcher

*"This thing is really good for my shoulder and hamstring. It also helped my after-game soreness. When it goes right to the pain, I know it is working."*

**Garrison Hearst**  
NFL Running Back

*All statements regarding health testimonials are descriptions of individual experiences and are independent research observations and are not medical claims made by Future Trend Energy Centre.*

### **Boxing Promoter, Former Lightweight Champion**

*"My body has plenty of wear and tear from old boxing injuries. The PAP-IMI really helped the pain in my shoulder and fists. It made my body feel a whole lot better. I plan to continue using the PAP-IMI on myself and on all of my boxers as well."*

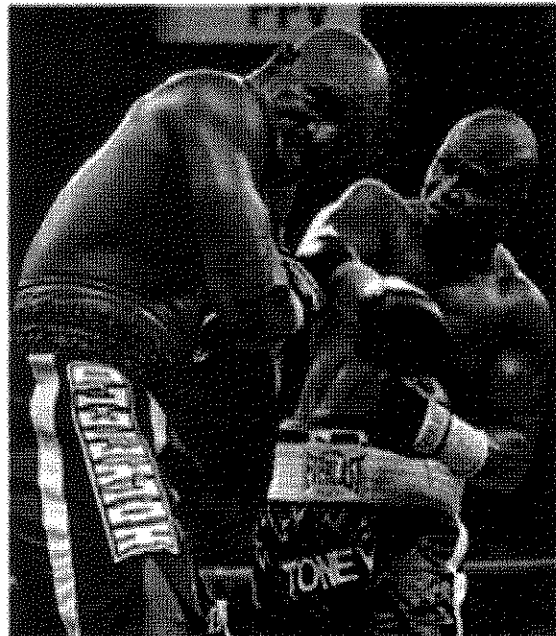

**Carlos Palomino**

Carlos Palomino has been a participant at Bio-Energy Services, Inc. since February 2003. James Toney and Alejandro Virgen came into our clinic as a result of his testimonial. Carlos is such a strong believer in the PAP-IMI that he will be attending a training course to become a certified PEMF operator. He will then use this knowledge to treat other boxers. Carlos is going to be inducted into the International Boxing Hall of Fame this coming June. Congratulations Carlos!

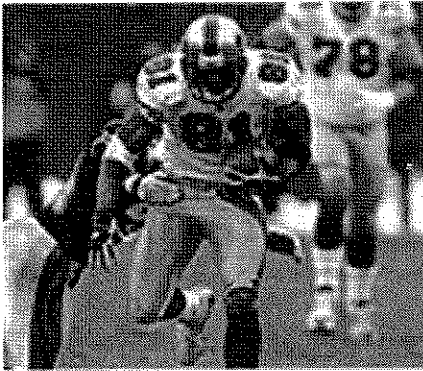

---

### **James "Lights Out" Toney defeats Holyfield!**

James "Lights Out" Toney was named 2003 "Fighter of the Year" by both The Ring magazine and the Boxing Writers Association of America. He defeated both cruiserweight champion Vassilij Jirov and heavyweight legend Evander Holyfield in becoming a three-division world champion. Toney received 20 PAP-IMI sessions before his bout with Holyfield.
